Earthquakes for week of
June 9 - 15, 1996

	1-2	2-3	3+	Total
Regional	10	6	0	16
Mammoth Lakes Region	162	31	4	197
This Week	172	37	4	213
Previous week	68	7	3	78

▼ **Mammoth Lakes Region:** Two brief, but vigorous, earthquake swarms were detected within the Long Valley caldera. The first swarm consisted of 37 events, including ten in the 2.0 range. It occurred Sunday morning near Casa Diablo Hot Springs and died out later that afternoon. The second swarm, centered in about the same location, was much stronger and consisted of 120 quakes, including 19 2.0s and a pair of 3.0s. It began early Thursday morning and was over about 24 hours later. A pair of 3.0s occurred south of the caldera near Mt. Morrison on Tuesday and Wednesday.

▼ **Regional Activity:** A pair of 2.0s were recorded in the Holbrook Junction seismic zone and a 2.2 quake triggered northwest of Reno, near Bordertown.
