

Seismo-Watch

Earthquakes for week of
August 4 - 10, 1996

	1-2	2-3	3+	Total
Regional	7	9	1	17
Mammoth Lakes Region	109	12	0	121
This Week	116	21	1	138
Previous week	150	16	0	166

▼ **Mammoth Lakes Region:** Activity remained elevated for the second straight week. Twelve of the 121 events registered in the 2.0 range, but all were in the lower 2.0 range.

▼ **Regional Activity:** A light jolt occurred late Monday night along the northern shore of Walker Lake. The 3.3 quake occurred along the northern segment of the Wassuk fault zone - a prominent fault zone along the eastern flank of the Wassuk Range. Spectacular fault offsets of more than 6 feet displace Holocene Walker Lake shorelines indicating this fault ruptured within the recent geologic past.

▼ A pair of 2.0s triggered in the Desolation Wilderness Area and the largest of six events east of Mono Lake near the CA/NV border measured 2.9.
