

## Seismo-Watch

Earthquakes for week of  
**August 11 - 17, 1996**

	1-2	2-3	3+	Total
<b>Regional</b>	17	4	1	22
Mammoth Lakes Region	36	6	1	43
<b>This Week</b>	53	10	2	65
Previous week	116	21	1	138

▼ **Mammoth Lakes Region:** Seismicity returned to normal background levels. The largest quake measured 3.0 and occurred along the southeast margin of the caldera near Lake Crowley. Although it was strong enough to be felt, there were no reports.

▼ **Regional Activity:** A quake registering 3.6 was recorded about 30 miles southwest of Eureka in Antelope Valley. This is an active seismic region of the Basin and Range with 18 events registering  $\geq 3.0$  since 1954, including four events in the 4.0 range.

▼ A sequence of seven quakes occurred north of Bishop in Chalfant Valley and two clusters totalling seven temblors were detected southwest of Hawthorne near Mt. Hicks. A 2.1 occurred south of Salt Wells along the northern the Bunejug Mountains.
