Earthquakes for week of
September 22 - 28, 1996

	1-2	2-3	3+	Total
Regional	9	9	1	19
Mammoth Lakes Region	43	4	0	47
This Week	52	13	1	63
Previous week	45	13	1	59

▼ **Regional Activity:** Seismicity remained above normal background levels for the region. The largest quake registered 3.2 and occurred Saturday, September 28, about 10 miles north Bishop in Chalfant Valley. The quake was centered on the west side of the valley and along the Fish Slough fault zone.

▼ Five quakes, including three in the 2.0 range occurred in northern Fish Springs Valley. A 2.1 triggered in eastern Mono Valley, a 2.2 was recorded in the Holbrook Junction seismic zone, and a 2.1 was detected along the Genoa fault system at Woodfords.

▼ Six quakes were recorded in the Sierra west of Mammoth Lakes in Yosemite National Park.

▼ **Mammoth Lakes Region:** The largest of 47 quakes registered 2.7 and occurred at Lake Crowley.
