

Seismo-Watch

Earthquakes for week of
November 17 - 23, 1996

	1-2	2-3	3+	Total
Regional	10	5	0	
Mammoth Lakes Region	30	11	0	
This Week	40	16	0	
Previous week	57	9	2	

▼ **Regional Activity:** Regional earthquake activity has been reduced to 15 events for the week. The largest earthquake measured 2.8 and occurred two months past midnight Sunday morning in Owens Valley about nine miles northwest of Bishop. There were no reports of the quake being felt.

▼ Activity of notable interest included a 2.6 ten miles northeast of Tonopah in Ralston Valley, a 2.2 southwest of Mina, two quakes in the Sierra west of Mammoth Lakes, and two 1.0s at Border Town.

▼ **Mammoth Lakes Region:** While the total number of temblors remained about the same as last week, the intensity of activity increased, with eleven quakes in the 2.0 range, including one as large as 2.9. Most of the +2.0 events triggered at Mammoth Mountain.
