

## Seismo-Watch

Earthquakes for week of  
**January 5 - 11, 1997**

	1-2	2-3	3+	Total
<b>Regional</b>	<b>14</b>	<b>6</b>	<b>1</b>	<b>21</b>
Mammoth Lakes Region	14	1	0	15
<b>This Week</b>	<b>28</b>	<b>7</b>	<b>1</b>	<b>36</b>
Previous week	18	4	0	22

▼ **Regional Activity:** Jumped above the 20 events per week mark. Most of the activity was centered within 10 miles the California/Nevada border. Leading the activity was a cluster of five quakes NW of Reno near Bordertown. The series included three 2.0s and one as large as 3.0 and was centered along the eastern flank of the Bald Mountain Range, near Crystal Peak, and along the Bald Mountain fault.

▼ **The Antelope Valley aftershock zone** continued with six events in the 1.0 range. A 2.8 was centered in the Holbrook Junction seismic zone and a 2.0 triggered near Sonora Junction on HWY 395.

▼ **Mammoth Lakes Region:** Seismic activity remained low for the second straight week, probably from disabled equipment due to the Winter storms.
