Earthquakes for week of  
**January 12 - 18, 1997**

	1-2	2-3	3+	Total
<b>Regional</b>	13	19	5	37
Mammoth Lakes Region	13	1	0	14
<b>This Week</b>	26	20	5	51
Previous week	28	7	1	36

▼ **Regional Activity:** The largest earthquake measured 3.9 and occurred Friday morning within Pahrump Valley in Southern Nevada. It was followed 20 min. later by another jolt registering 3.1. It is likely both quakes were felt but there were no reports.

▼ Two temblors in the 3.0 range triggered in Owens Valley near Bishop. The largest measured 3.2 and occurred late Wednesday night 3 mi. SW of town along the Sierra. A series of ten events started the next day on the east side of the valley, near the Owens River, and included one as large as 3.1.

▼ The largest of ten quakes centered about 6 mi. W of Bordertown near Crystal Peak registered 2.8.

▼ A temblor measuring 3.1 was recorded Monday afternoon 15 mi. SW of Susanville.
