

Seismo-Watch

Earthquakes for week of
February 23 - March 1, 1997

	1-2	2-3	3+	Total
Regional	12	7	0	19
Mammoth Lakes Region	35	5	0	40
This Week	47	12	0	59
Previous week	59	22	4	85

▼ **Mammoth Lakes Region:** Activity at Mammoth Lakes declined following last week's M4.1 event. Most of the seismicity was recorded south of the caldera near Mt. Morrison. The largest quake registered M2.6 and occurred Tuesday evening between Mt. Morrison and Lake Crowley. A few temblors triggered on the caldera and a M2.2 quake was centered west of Bishop in Upper Round Valley.

▼ **Regional Activity:** The largest of three quakes in the Bordertown seismic zone registered M2.7 and occurred Thursday afternoon. A M2.0 was detected between Holbrook Junction and Markleeville, a M2.3 triggered SW of Hawthorne near the Borealis Mine, and a M2.3 was measured on the east of Mina near the Nye-Mineral-Esmeralda Tri-County border.
