Earthquakes for week of **March 9 - 15, 1997**

	1-2	2-3	3+	Total
<b>Regional</b>	9	8	1	18
Mammoth Lakes Region	22	0	0	22
<b>This Week</b>	31	8	1	40
Previous week	47	12	0	59

▼ **Regional Activity:** The largest earthquake measured M3.0 and occurred Monday, March 8, about 8 miles west of Bishop in Round Valley. The quake was followed by ten tremors during the next five days. Although it is likely to have been felt, it past without any reports. A M2.9 event was recorded about 8 miles to the south near Big Pine.

▼ A couple of quakes triggered northwest of Reno in the Bordertown seismic zone, a 2.4 was recorded southeast of Topaz Lake in the Antelope Valley, and a M2.8 temblor happened southeast of Gabbs in the southern Toiyabe Range.

▼ **Mammoth Lakes Region:** Activity at Mammoth Lakes reduced to its lowest level since the first week of February. No M2.0+ activity was recorded.
