

Seismo-Watch

Earthquakes for week of
March 30 - April 2, 1997

	1-2	2-3	3+	Total
Regional	9	1	0	10
Mammoth Lakes Region	35	6	2	43
This Week	44	7	2	53
Previous week	33	4	3	40

▼ **Activity Summary:** Regional seismicity dropped to its lowest levels in five months while activity at Mammoth Lakes increased to 43 events, it's highest total since two M4.0s shook the region last month.

▼ **Regional Activity:** The only quake to register in the M2.0 range occurred in the Antelope Valley seismic zone Wednesday night and measured M2.9.

▼ **Activity returned to the Bordertown seismic zone** with two quakes measuring M1.5 and M1.6. More than 120 earthquakes have been detected here since the resurgence of activity began in October 1996.

▼ **Mammoth Lakes Region:** A M3.3 was the largest of a flurry of quakes along the southern caldera rim near Convict Lake and a M3.1 on Saturday was centered under Lake Crowley at a depth of 1 km.
