

Program Structure Conventions

Applications can separate pages including comments conforming to a Structuring Convention:

```
%!PS-Adobe-1.0
%%Creator: machine:user (John User)
%%Title: filename
%%CreationDate: Mon Jan 25 13:57:40 1993
%%DocumentFonts: Times-Roman
%%Pages: (atend)
%%BoundingBox: 0 0 612 792
%%EndComments
.
.
.
% Procedure Definitions
.
.
.
%%EndProlog
%%Page: ? 1
.
.
.
% Page 1 Description
.
.
.
%%Page: ? 2
.
.
.
% Page 2 Description
.
.
.
%%Trailer
.
.
.
% Trailing comments, restores
.
.
.
%%Pages: 2
```

Some useful programs cannot conform, and some applications misinterpret them:

```
/poster { /Times-Bold findfont 600 scalefont setfont
10 setflat 80 150 moveto (Post) show} def
poster showpage -612 0 translate poster showpage
```

The image shows the word "Post" in a large, bold, serif font. The letter 'P' is contained within the left rectangular box, and the letters 'ost' are contained within the right rectangular box. The boxes are adjacent and have thin black borders.
